AUTHOR Morton, J. B.; And Others
TITLE A Historical and Current Follow-Up Study of Oklahoma Vocational-Technical Graduates.
INSTITUTION Oklahoma State Dept. of Vocational and Technical Education, Stillwater. Div. of Research, Planning, and Evaluation.
REPORT NO VT-102-167
PUB DATE 75
NOTE 196p.
EDRS PRICE MF-\$0.76 HC-\$9.51 Plus Postage
DESCRIPTORS *Employment Experience; Employment Statistics; *Followup Studies; *Graduate Surveys; Post Secondary Education; Secondary Education; *Tables (Data); Technical Education; Vocational Education; *Vocational Followup
IDENTIFIERS Occupational Training Information Systems; Oklahoma; OTIS

ABSTRACT

The report presents the findings of followup surveys of secondary and postsecondary graduates of vocational-technical programs in Oklahoma from 1970 to 1974. The purpose of this study was to examine the post-training experiences of vocational-technical graduates the first, third, and fifth year after completing the training program. The information obtained is of use in program evaluation, Federal reports, and manpower support data for the Occupational Training Information Systems (OTIS). The results of the survey appear in three tables and provide information about the number of employed graduates and the relationship of employment to training. (NJ)

CHAPTER I

BACKGROUND AND PROCEDURES

Introduction

The Oklahoma State Department of Vocational and Technical Education provides support for training for the purpose of providing students with the knowledge and skills necessary to enter and succeed in the world of work. It is necessary to examine the post-training experiences to get information for program evaluation, federal reports, and manpower support data for the Occupational Training Information System (OTIS).

The Oklahoma State Department of Vocational and Technical Education has been conducting follow-up surveys on individual students since 1965. The follow-up information was not standardized until 1969. This report presents the findings of the surveys from 1970 to 1974.

Purpose of the Study

The purpose of this study is to answer the question, "What has been the post-training experience of vocational-technical graduates the first, third, and fifth year after completing the training program?"

Delimitations

The report is delimited by the following factors:

1. Comprehensive Home Economics is not included in this report. The purpose of this program does not include preparing a student to enter the labor force as one of its major objectives.
2. Follow-up data on adult students, CETA students, and special schools students are not included in the report because the data was either not available or was published in other documents.

This report does include follow-up of secondary and post secondary graduates from vocational-technical programs for the years 1970 to 1974 inclusively.

The Follow-Up Procedure

The 1969-79 enrollment form was identified as VE6000 and students were followed with a combination completion and follow-up data card generated by the OTIS project and delivered to the Research Coordinating Unit (RCU). The RCU was responsible for collecting completion and follow-up data from the teachers. During this period, all students identified by the OTIS project were followed to determine who had graduated and what those graduates were doing in October following graduation.

A three-report student accounting system was developed in 1970-71 and revised in 1973-74 to a one-entry system including the following reports to be submitted by the teacher.

1. The student enrollment form to be filled out for all new students in each vocational program.
2. The student status report, a computer printout of last year's students, to be updated with follow-up information or perpetuated enrollment data.
3. The student follow-up report to be completed on students who graduated or completed the program three and five years ago.

CHAPTER II

SURVEY RESULTS

Introduction

This chapter presents the results of the survey described in Chapter I. Table I indicates the relationship of last year's graduates to graduates employed and graduates employed in jobs related to training by divisions. Table II shows the first year follow-up information by occupational objective and divisional first, third, and fifth year follow-up information. Table III is a listing by program and division of the 1973-74 follow-up information for each school.

Explanation of Terms and Tables

Available for the labor force refers to those vocational-technical graduates who are employed in a related field, employed in an unrelated field, employed part time, and unemployed.

Employed related refers to those vocational-technical graduates or dropouts who are employed full time in an occupation that is the same as, or closely related to, the occupation for which the training program is designed.

Employed unrelated refers to those vocational-technical graduates or dropouts that are employed full time in an occupation that is not closely related to the occupation for which the training program is designed.

Employed part time refers to those vocational-technical graduates or dropouts that are currently employed on a part-time basis and not in school full time regardless of whether the particular job they are engaged in is related or unrelated to training.

Unemployed refers to those vocational-technical graduates who are unemployed and seeking employment.

School related refers to those vocational-technical graduates or dropouts that have returned to school full time and are engaged in course work or a program of study related to the training they received from their particular vocational-technical program.

School unrelated refers to those vocational-technical graduates or dropouts that have returned to school full time and are engaged in course work or a program of study unrelated to the training they received from their particular vocational-technical program.

the "School Related," "School Unrelated," "Armed Forces," and "Not in Labor Force" categories. The final category listed in the tables, "Status Unknown" designates what percent of the total number of program graduates could not, due to insufficient information, be placed in any of the previously mentioned eight categories.

Armed forces--refers to those vocational-technical graduates or dropouts that are serving in the Armed Forces. The 1973-74 data considers voluntary service in the Armed Forces as employment and may be either related or unrelated.

Not in labor force--refers to those vocational-technical graduates or dropouts that are not in the labor force; that is, those not gainfully employed or seeking employment.

Unknown--refers to those vocational-technical graduates or dropouts that the survey respondents (i.e. teachers) were unable to place in any of the other eight categories defined above due to insufficient information.

Number of graduates--the raw number of graduates or dropouts who have completed the training program. This information was obtained from the student status report by the teacher.

Follow-up responses--the raw number of follow-up responses received from the teacher on his graduates or dropouts who have completed the training program. This information was obtained from the student status report which is submitted by the teacher in October of each year on the post-training status of each student.

Table I of this study is a bar graph presenting the relation of graduates to graduates employed and graduates employed in jobs related to training by divisions. This information pertains to 1973-74 graduates.

Table II of this study presents first year follow-up on the 1969-70, 1970-71, 1971-72, 1972-73, and 1973-74 graduates by each program. It presents, by division, first year follow-up information for the years 1967-68, 1968-69, 1969-70, 1970-71, 1971-72, 1972-73 and 1973-74. Third year follow-up by division is given for 1968-69, 1969-70, 1970-71, and 1971-72. Fifth year follow-up information is given for 1968-69 and 1969-70. If, in the report by program, there is no follow-up data available on a program for a particular year, the percentages for that year in that program will be zero. If the total number of follow-up responses for a program in a particular year is less than 30, an asterisk is printed by the year.

Table III of this study presents first year follow up information by program on each school in the state. This information is reported on the 1973-74 graduates. A summary of the follow up data is given both for the programs handled in the report and for each division.

The interpretation of Table II and Table III headings is as follows. From left to right, the column titled "Program Title" in Table II lists those programs offered on which follow up information was available. The column title "School" in Table III lists those schools offering programs on which follow-up information was available. The column "Percent Available for Labor Force" designates what percent of the total number of program graduates are combined into the "Employed Related," "Employed Unrelated," "Employed Part-time," and the "Unemployed" categories. The next four columns in the percent of the tables, which are under the general heading "Available for Labor Market," designate what total number of program graduates available for the labor force fall in the "Employed Related," "Employed Unrelated," "Employed Part Time," and "Unemployed" categories. The four columns under the broad heading "Unavailable for Labor Market" designate what percent of the total number of program graduates fall into
